

**REACH registration, SVHC list**

Dear Sir, dear Madam,

Thank you for your enquiry on compliance with the following ordinance: (EC) No. 1907/2006 (REACH). We can confirm that we comply with the requirements resulting for us from the REACH Ordinance (version 16.07.2019)

In line with Article 32, we have a mandatory duty to inform stakeholders in the downstream supply chain for materials as such, and for mixtures for which a safety data sheet is not required.

We have registered our aluminium under registration number GZ934588-91 with effect as of 18.11.2010 with the European Chemicals Agency.

Restrictions as per Annex XVII of the cited Ordinance do not result from the registration of our aluminium.

Based on our current information, the aluminium products we deliver, with the exception of EN AW-2011 lead include max. 0,3, do not contain any materials on the list currently published by the European Chemicals Agency as per Article 59 Para. 1 of Ordinance (EC) No. 1907/2006 (REACH) ("List of Candidates") with more than 0.1 mass/%. This declaration is valid for mill-finished and colourless anodized ("C-0 farblos" resp. "EV1 Naturton") aluminium products. If you purchase coloured or coated products from AWW, a separate REACH declaration must be requested.

We hope that this information answers your questions to your satisfaction; we can assure you that we will continue to comply with all requirements under the REACH Ordinance.

All details were provided to the best of our knowledge. They reflect the current state of the art. The details do not constitute an assurance under warranty.

If you have any further questions, please contact our central contact person for REACH, Mr. Wolfgang Hoferer, by E-Mail on [whoferer@aww.de](mailto:whoferer@aww.de).

With kind regards

Aluminium-Werke Wutöschingen AG & Co.KG

Wolfgang Hoferer
